Chamber of Industry and Commerce
Aachen

Vorwort

Die Kunststoffbranche ist eine der wichtigsten und zukunftsorientiertesten Bereiche in Deutschland. Hierbei verfügt die Euregio Maas-Rhein über ein vielfältiges Potenzial an "Kunststofftechnik-Standbeinen" durch Unternehmen und Forschungseinrichtungen, die in der Kunststoffbranche tätig sind. Über 200 Unternehmen bieten moderne maßgeschneiderte Lösungen zu allen möglichen Problemstellungen in diesem Bereich an. Hersteller und Händler, Ingenieure und Wissenschaftler arbeiten Hand in Hand, um effiziente Verfahren, Anlagen und Produkte zu realisieren. Zahlreiche Dienstleister helfen den vielfältigen Anforderungen in Industrie und Gewerbe praxisgerecht nachzukommen.

Die vorliegende, 2. Ausgabe des Technologiefeldprospektes zeigt, wie vielfältig die Aktivitäten und Initiativen im Bereich der Kunststofftechnik und ihrer Anwendung in der Euregio Maas-Rhein bereits sind. Forschung und Entwicklung, Produktion und Vertrieb arbeiten beispielhaft zusammen.

Insgesamt ist die Euregio Mass-Rhein für die Herausforderungen der Kunststofftechnik gut eingestellt. Wir sind daher sicher, auch in diesem Technologiefeld eine ausgezeichnete Ausgangsposition für die weitere Entwicklung und Zusammenarbeit mit der Euregio Maas-Rhein zu besitzen. Auf den folgenden Seiten wollen wir Ihnen einen Überblick über die vielgestaltige Kunststoffbranche in der Euregio Maas-Rhein vermitteln.

Industrie- und Handelskammer Aachen

Dipl.-Kfm. Michael Wirtz
Präsident der IHK Aachen

Foreword

The plastics industry is one of the most important and future-orientated industries in Germany. And the Euregio Meuse-Rhine has a varied potential in "plastics technology main posts" based on companies active in the plastics industry. More than 200 companies provide modern, tailor-made solutions to all problems in this area. Manufacturers and dealers, engineers and scientists work hand-in-hand to implement efficient processes, plants and products. Numerous service companies help to fulfil the various requirements in trade and industry in practical ways.

The second edition of the prospect in the field of technology show the extent the variety of the activities and initiatives in plastics technology in the Euregio Meuse-Rhine have already reached. Research and development, production and marketing co-operate in an exemplary manner.

Altogether, the Euregio Meuse-Rhine is well geared for the challenges of plastics technology. We are therefore certain we have an excellent stating position also in this field of technology for further development and co-operation with the Euregio Meuse-Rhine as an integrated site in the heart of Europe. The following pages provide an overview of the diversification in the plastics industry in the Euregio Meuse-Rhine.

For the Chambers of Industry and Commerce of the Euregio Meuse-Rhine

Michael Wirtz (Dipl.-Kfm.)
President of the IHK Aachen

Map of the Euregio Meuse-Rhine

The Euregio Meuse-Rhine

Situated in the heart of Europe, the Euregio Meuse-Rhine, with its five regions, three countries and three languages, has, as far as the European idea is concerned, numerous "strong points" to offer: a rich cultural heritage, an enormous economic potential, future-oriented economic structures, a variety of landscapes and, last but not least, first-hand experience in living and working together with their European neighbours.

The Euregio Meuse-Rhine comprises the Belgian provinces Limburg, Liege and the German-speaking community of Belgium, the Dutch region South Limburg, the German districts of Aachen, Düren, Euskirchen and Heinsberg and the city of Aachen itself, covering a total area of 10,400 km², with a population of 3.7 million and approximately 250,000 established companies. About half of the population lives in Belgium, a third in Germany and a fifth in The Netherlands.

The gross domestic product (GDP) of the Euregio amounted to 71.4 billion Euro in 1997, which is more than half of the equivalent statistic for Denmark. Looking at it comparatively in 1999 the GDP of Portugal and Ireland was 97 billion and 87 billion Euro respectively.

RIGHT IN THE MIDDLE OF EUROPE

The Euregio Meuse-Rhine can be regarded as a nucleus and the driving force behind European integration. Here, where the language changes every ten minutes, where you go shopping in The Netherlands, live in Belgium but go to the doctors in Germany, the advantages of open borders and the common currency are only too obvious. The Euregio has always seen itself as a podium for cross-border contacts and cultural and economic exchanges.

Its central position and efficient traffic infrastructure ensures that the major European economic centres are easily accessible. For instance, the high-speed train Thalys offers excellent connections to Brussels, Paris and London. Via the road network an area encompassing a population of 55 million – which means a quarter of the total purchasing power of the EU – can be reached within four hours. The regional airports in Maastricht and Liege and the international airports nearby in Brussels, Cologne/Bonn and Duesseldorf ensure European and intercontinental connections.

A REGION THAT'S GOING PLACES

The considerable stream of commuters bears witness that the national employment markets of the Euregio are already closely intertwined. Every day more than 30,000 people cross the border to go to work. A well developed road network guarantees the Euregio population a high degree of mobility. Improvements are also planned for the railway network, with the cross-border "euregiobahn" in Germany and the "Light-Rail System" projects in Belgium and The Netherlands.

Despite the 1.3 million people in employment, the problem of unemployment in the Euregio Meuse-Rhine has not been completely overcome. The unemployment rate in 1999 ranged from 4,3 % in South Limburg to 12 % in parts of the Liege Province. The average unemployment rate of 8,8 % was, however, below the EU average of 9,4 % and the trend has been downward for some years now. This is mainly due to increased employment in the services sector.

High-quality services in the field of research and development play a very important part here. The many universities and research institutes are producing a new highly-qualified and internationally orientated generation of scientists with their main emphasis on technology and natural science. This enormous technological potential has been a decisive factor in the revival of the Euregio Meuse-Rhine.

EUtech ist in der Energiewirtschaft und –technik sowie im Umwelt- und Klimaschutz tätig. In beiden Geschäftsfeldern bieten wir technische, wirtschaftliche und strategische Beratung. Wir erstellen Energieanalysen und –versorgungskonzepte für die Industrie, Gebäude und Branchen; u. a. haben wir für die Kunststoff verarbeitende Industrie in Nordrhein-Westfalen ein Branchenenergiekonzept erarbeitet. Im Bereich des Klimaschutzes unterstützen wir Unternehmen bei der Erstellung von CO₂-Inventaren und der Identifizierung von Emissionsminderungspotenzialen. Neben der allgemeinen Beratungstätigkeit stehen wir unseren Kunden mit speziellen Dienstleistungen zur Verfügung: wir optimieren Prozesse und Anlagen, erstellen Studien und technische Gutachten und führen Seminare oder Konferenzen durch.

Eutech is active in energy management and technology as well as environmental and climate protection. We provide technical, economic and strategic consulting in both these fields. We prepare energy analyses and supply concepts for industry, buildings and individual industries; we have also devised an industry energy concept for the plastics processing industry in North Rhine-Westphalia. Within the field of climate protection, we support companies in the drafting of CO₂ inventories and the identification of emission-reducing potential. In addition to general consulting activities we also provide our customers with special services: we optimise processes and plant, prepare studies and expert technical reports and conduct seminars or conferences.

Products/Services:

Vor über 250 Jahren wurde HOESCH als metallverarbeitendes Unternehmen gegründet. Hoesch stellte als erstes deutsches Unternehmen Badewannen aus hochwertigem Sanitär-Acryl her und hat seitdem seine Produktvielfalt ständig erweitert. Heute ist HOESCH Marktführer bei Bade-, Dusch- und Whirlwannen aus Acryl und bedeutender Hersteller von Duschabtrennungen – die in unserem Werk Dürener Metallhandel GmbH in Andernach gefertigt werden -, Whirlpools, Römischen Dampfbädern und weiteren Wellnessprodukten.

Auch in Forschung und Entwicklung ist HOESCH äußerst aktiv und setzt mit seinen Innovationen immer neue Maßstäbe im Markt.

HOESCH was founded over 250 years ago as a metalworking company. It was the first German company to produce bathtubs in high-grade sanitary acrylic and has been constantly expanding its product portfolio since. Today HOESCH is market leader in the field of acrylic bathtubs, shower trays and whirlpool tubs and a leading manufacturer of shower cabinets - which are produced at the Dürener Metallhandel in Andernach -, whirlpools, Roman steam baths and other wellness products. HOESCH is also extremely active in the field of research and development and is constantly setting new standards in the market with its innovations.

Seit fast 40 Jahren verarbeitet die Firma Valder im Spritzgussverfahren sämtliche Thermoplaste zu Kunststoffartikeln für unterschiedlichste Anforderungen.

Der Spritzgussmaschinenpark umfasst mehr als 40 vollautomatische bildschirm- und rechnergesteuerte Automaten. Derzeitiges Schussgewicht bis 1000 gr.

Weiterverarbeitung durch Ultraschallverschweißung, Montieren und Kleben

Herstellung hoher Oberflächenqualität, zur Veredlung im Galvanoverfahren (Verchromen und Vergolden)

Valder has been processing all thermoplastics in injection moulding processes to make plastic articles for vastly differing requirements for almost 40 years.

The injection moulding machinery comprises more than 40 completely automatic screen and computer controlled units. Current shot: up to 1,000 g.

Further processing by ultrasonic bonding, assembly and gluing

Manufacture of high surface quality for processing in galvano process (chromium and gold plating)

Products/Services:

Die NMC Gruppe richtet ihre Aktivität auf die Verarbeitung von Kunststoffen aus. Auf dem europäischen Markt ist NMC ein Referenzunternehmen im Bereich der Entwicklung und Herstellung von extrudierten Produkten aus geschlossenzelligem Kunstschaumstoff (Polyethylen, Polystyrol Polyurethan und Synthesekautschuk).

Die NMC Gruppe gliedert sich in 4 Divisionen:

Die Business Unit "Dekoration" ist Spezialist in der Herstellung von dekorativen Produkten für den Innen- und Außenbereich (Zierleisten, Rosetten und Deckenplatten)

Die Business Unit "Isolation" trägt wesentlich zum Umweltschutz bei, durch die Herstellung von thermoplastischen Rohrisolierschäumen

Die Business Unit "Nomafoam" bietet spezifische Lösungen für die verschiedensten industriellen Anwendungen an, u. a. in der Automobilindustrie, auf dem Gebiet der industriellen Verpackung sowie im Sport- und Freizeitbereich.

Die vierte Business Unit "Do It Yourself" vertreibt in Baumärkten und Supermärkten die von NMC produzierten Dekorationsprodukte und Isolationsprodukte.

The NMC Group focuses activities on the processing of plastics. NMC is a reference company on the European market in the field of the development and production of extruded products made of closed-cell synthetic cellular material (polyethylene, polystyrene, polyurethane and synthetic rubber).

The NMC Group is divided into 4 divisions:

The Business Unit "Decoration" is the specialist in the manufacture of decorative products for indoor and outdoor use (trimmings, rosettes and ceiling panels)

The Business Unit "Insulation" makes a considerable contribution to environmental protection by manufacturing thermoplastic pipe insulation foams

The Business Unit "Nomafoam" offers specific solutions for vastly differing industrial applications, including in the automotive industry, in the field of industrial packaging as well as in sport and leisure activities.

The fourth Business Unit "Do It Yourself" markets the NMC decorative and insulation products in DIY centres and supermarkets.
